

MIDAS # 3496

MOOSE POND

PARIS TWP., OXFORD CO., MAINE

AREA 96 ACRES

MOOSE POND

West Paris Twp., Oxford Co.
U.S.G.S. West Sumner, Me. (7.5')

Fishes

Largemouth bass	White sucker
Yellow perch	Bullhead (hornpout)
Chain pickerel	Pumpkinseed sunfish
Minnows	American eel
Golden shiner	
Common shiner	

Physical Characteristics

Area - 96 acres

Maximum depth - 10 feet

Temperatures:

Surface - 78°F

9 feet - 72°F

Principal fisheries: Largemouth bass, Yellow perch, and chain pickerel

This shallow pond does not thermally stratify during the summer. A lack of coldwater habitat and the presence of competing and predatory warmwater fish severely limit opportunities to manage for coldwater fish. Water quality is well suited for warmwater fish, which are the focus of management. This pond has a reputation for its' abundant pickerel population.

A state sponsored boat launch is located near the outlet dam.

Surveyed - August 1956

(Revised - 1999)
